- **Version Control:** Git, GitHub, Vercel,
- **Management:** Trello, ClickUp, Jira,
- **Misc:** SDLC, Algorithms, Linux, postman, Swagger, Agile, Figma, Vercel, WordPress,
- **Other Skills:** Communication, Teamwork, Project Management, Agile Methodologies, Strategic Planning, Technical writing,

Work Experience

Frontend Developer

Yebox Technologies

Feb 2022 – Present (fulltime)

Lagos, Nigeria

- Built responsive, animated, and functional web applications in Nextjs, ReactJs, and Typescript, to carry out CRUD features thereby improving the user experience.
- Built version two and optimized the company's website using Vue js to increase online visibility.
- Created several admin dashboards performing different functionalities like filters, roles, settings, permission, crud, etc using react, redux, context API, etc.
- Implemented the creation of the new company website using React-js while ensuring great UX experience, ease of use, PWA, and load time optimization.
- Implemented client-side testing using Jest to ensure the app worked as intended.
- Designed Frontend Architecture and folder structure to allow for maintainability, code reuse, and longevity by following react best practices, DRY, Abstraction principles, and a Declarative Programming Approach.
- Worked with Scrum methodology with no supervision and reported directly to the product owner.
- Implemented the use of external libraries whenever necessary to cut down development time.
- Ensured error handling everywhere necessary to improve user experience and prevent memory leaks.
- Worked with UI designer to ensure Figma design stayed relevant to core business logic.
- Managed stories/tasks and estimated efforts and timelines at a granular level.

Product Manager

Studio 4852

May 2022 – October 2022 (part-time)

Remotely, UK

- Set product vision and strategy while leading a team of developer, designer, content creator, and media manager in delivering the right product to the market.
- Ensure all products are customer-centric and solution-centric
- Carry out research, gather, analyze and interpret data, and plan long-term development of the product.
- Create product roadmap, features, and requirements, and articulated the business rationale behind it.
- Wrote Software Requirement Specifications & Functional Requirement Documents for different products before building them to ensure the features and processes were well documented.
- Thoroughly tested projects on multiple browsers and devices to confirm cross-browser compatibility, accessibility, and responsiveness thereby improving the user experience and assuring quality.

Frontend Developer

Tiidelab

June 2021 – Dec 2021(Internship)

Lagos, Nigeria

- Designed and developed user interfaces of websites using Figma, HTML, CSS, and JavaScript to enhance visibility.
- Wrote Software Requirement Specifications & Functional Requirement Documents for different products before building them to ensure the features and processes were well documented.
- Thoroughly tested projects on multiple browsers and devices to confirm cross-browser compatibility, accessibility, and responsiveness thereby improving the user experience.
- Worked with an Agile methodology to create client-side components using.
- Transformed Figma design into SPA using React-JS, and CSS modules.

IT Assistant

Alaf Consult

Feb 2020 – May 2021 (full time)

Lagos, Nigeria

- Created and managed the front-end of the Alaf consult website using Wixsite.
- Set up and anchored meetings for the developers and clients.
- Supervised and managed version control for the projects worked on.

Projects & Volunteering

- **HealthXP:** designed desktop view and user flow of the web design with figma and implemented using typescript and reactjs.
- **Kapparri Enterprise:** implemented event page for a product Sabimech which links car repairers to car owners.
- **Tiidelab - Aphrodite:** implemented user dashboard and landing page for product.
- **HacktoberFest 2021, 2022 :** Contributed to open source projects.
